## WORK EXPERIENCE

### Senior Blockchain Developer Nakamura Ltd.

08/2020 - Present

Tokyo, Japan

#### Achievements/Tasks

- As a blockchain developer, I specialized in utilizing a diverse tech stack that included Next.js, Tailwind CSS, Solidity, Hardhat, GraphQL, PostgreSQL, Web3.js, and Ethers.js for various blockchains such as Polygon, Solana, and Ethereum.
- My expertise was instrumental in contributing to both front-end and back-end development for blockchain projects. I collaborated with my team using Jira for seamless teamwork and leveraged GitHub for version control.
- One of the notable projects I contributed to is Singular NFT Marketplace, a widely adopted platform in the blockchain ecosystem.
