CERTIFICATIONS

SEPT 2021- JAN 2023

Full Stack Java Developer (Master's Program), Simplilearn

Credentials URL: <https://tinyurl.com/d6rty4k4>

Projects

1# Project Title: LockedMe

Technologies Used: Java, Git, Eclipse

Project Description: LockedMe is a simple, console-based Java application designed to manage file and folder operations. The application enables users to perform various file operations through a command line interface. The project's main objective was to complete its features, plan the development through sprints, and push the source code to a GitHub repository.

2# Project Title: Kitchen Story - E-commerce Food Portal

Technologies Used: HTML, Bootstrap, CSS

Project Description: Kitchen Story is an innovative e-commerce portal focused on offering a streamlined shopping experience for purchasing basic food items. The project's goal was to develop a user-friendly platform that allows customers to easily search, select, and purchase food items. Additionally, an admin backend was implemented to manage the inventory and ensure smooth operations.

3# Project Title: FlyAway – Airline Booking Portal

Technologies Used: Java, Maven, Eclipse, Git, Servlets, JSP, HTML, MySQL, JDBC, CSS, Bootstrap, JavaScript

Project Description: FlyAway is an airline booking portal aimed at providing a user-friendly platform for customers to book flights. As a Full Stack Developer, I was involved in the end-to-end development of this web application, from front-end design to back-end functionality and database integration.

4# Project Title: Sporty Shoes – E-commerce Portal

Technologies Used: Java, Git, MySQL, Hibernate, JDBC, JSP, Maven, Spring Boot

Project Description: Developed a prototype for Sporty Shoes, an e-commerce portal designed for a company specializing in sports shoes. The project's aim was to showcase the capabilities, appearance, and user interactions of the e-commerce portal to stakeholders for budget approval.

5# Project Title: My Movie Plan – Online Ticket Booking Portal

Technologies Used: Java, NodeJS, JSP, Angular, Bootstrap, HTML/CSS, JavaScript, MySQL, Oracle, Selenium, Jasmine, TestNG, Git, GitHub, Jenkins, Docker, Kubernetes, AWS

Project Description: MyMoviePlan is a dynamic web application developed to rejuvenate the declining sales of NMS Cinemas. The application focuses on providing an online platform for booking movie tickets across various genres and languages, aiming to enhance user experience and streamline the ticket purchasing process.

Activities

Chess • Learning new languages • Listening to music, watching movies.
