PROFILE

Web3 Engineer with over 7 years of experience in designing and developing user-friendly and intuitive decentralized applications on blockchain platforms. Skilled in **Web3** development using **React**, **Next.js**, **Typescript**, **Wagmi**, **TailwindCSS**, **Ethers.js**, **GraphQL**, **Subgraph** and **Solidity**, collaborating with cross-functional teams, and understanding blockchain protocols.

SKILLS

- React/Next.js/Vue.js
- Javascript/Typescript
- Hardhat/Truffle/Foundry/Anchor
- Wagmi
- AWS/GCP/Cpanel
- Svelte
- Sass/Tailwind CSS
- Web3.js/Ether.js
- Subgraph/GraphQL
- Express.js/Nest.js
- Smart Contract (Solidity / Rust)
- Ethereum/Solana/Polygon
- SQL/MySQL/MongoDB/PostgreSQL

PROFESSIONAL EXPERIENCE

2021/10 – 2024/04

Lead Blockchain/Frontend Developer

Hodldevs 📄

- Developed a private **NFT marketplace** 📄 on Avalanche for whitelisted artists.
- Developed **Coin flip Game** 📄 on SUI network and created smart contracts using **SUI Move**.
- Developed a **Job marketplace platform** 📄 on Avalanche and implemented **Diamond Proxy Pattern**(Multi-Facets Proxy) overcoming the 24KB size limit of smart contract.
- Designed and Created smart contracts for **Binary Options Trading Platform** on Arbitrum One.
- Built self-hosted **Oracle System** for token prices.
- Forked **GMX protocol contracts** and developed frontend using React/Typescript and Tradingview.

2022/01 – 2023/07

Lead Blockchain/Frontend developer

NFTyMeta 📄

- Created a smart contract for NFT Marketplace with **ERC721**, **ERC1155** and deployed it on 3 EVM-Compatible Networks(Polygon, Ethereum, BSC).
- Charged Fees For Secondary Sales by implementing **ERC2981** NFT royalty standard.
- Improved the user experience and implemented web3 integration for frontend and backend.
- Established a robust **CI/CD** pipeline using **Docker** for containerization, **CircleCI** for continuous integration, and **AWS S3** with Cloudfront for efficient content delivery.
- Developed an admin dashboard using **Next.js**, providing a performant and responsive user interface for administrators.

2019/10 – 2022/01

Senior FullStack Developer

Hockeyshare 📄

- Successfully migrated the main website management project from **Laravel 6 (PHP 7.2)** to **Laravel 9 (PHP 8.1)**, ensuring compatibility with the latest PHP version.

- Updated all necessary modules to align with PHP 8.1 standards and incorporated new features like enhanced routing, validating the functionality of all features.
- Developed a robust video processing microservice using **Node.js**, leveraging the latest framework capabilities.
- Implemented image scraping from a diagrammer website utilizing **Puppeteer** and **PhantomJS** for efficient data extraction.
- Produced videos from images using the powerful **FFmpeg** open-source library, enhancing the platform's multimedia capabilities.
- Migrated an existing AngularJS diagrammer project to **React 18**, leveraging the latest advancements in the React ecosystem.
- Implemented smooth touch gesture detection using **Hammer.js**, enhancing the user experience with responsive and intuitive interactions.
- Improved search performance significantly, achieving response times as low as 50ms by using **MeiliSearch** and **phpFastCache**.
- Leveraged caching mechanisms to store frequently accessed data, minimizing the need for repetitive database queries and improving overall system performance.

2018/04 – 2020/04

Frontend Developer

WhiteCloakTechnologies, I Philippines 

- Developed the Sky Contract Platform (Atlas) using **React**, **Java Spring Boot**, **MySQL**, and implemented JWT user authentication/authorization to establish a secure contract management system.
- Converted critical features from a legacy loan origination system built with ASP.NET Web Forms to a new web application powered by React, Redux, Typescript, and ASP.NET Core.
- Crafted and optimized RESTful APIs using **Node.js**, **Express**, **Spring Boot**, and **ASP.NET Core**, resulting in a remarkable 75% improvement in response times, enhancing overall system performance and user experience.
- Developed an email communication strategy, utilizing SendGrid to streamline and optimize our message delivery, ensuring efficient and reliable communication with stakeholders

2015/11 – 2018/03

React | React Native Developer

Pixel8, I Philippines 

- Designed and implemented user-friendly, responsive web pages using **React Native** to facilitate seamless client onboarding, access to personalized financial planning resources, and real-time communication with financial experts, accommodating 500+ users effectively
- Expertly executed the migration of the project from **JavaScript** to **TypeScript**, upgrading from MUI v4 to MUI v5, and transitioning from react-relay to Apollo for GraphQL.
- Building BRIDGES to use the GroundSDK (developed with **Swift**) in React Native, which enabled seamless integration and improved overall performance.
- Utilized Apollo **GraphQL** pub-sub system for the application to receive vehicle telemetry messages at a frequency of 0.5 second, and publish/subscribe events between vehicle and backend services.
- Optimized Openlayers map rendering performance by reducing memory usage with **React hooks**, which decreased map re-rendering time from 140ms to 20ms and enabled the application to connect from only 5 vehicles to up to 50 vehicles simultaneously

EDUCATION

2011 – 2015
Manila, Philippines

Bachelor's degree in Computer Science
Mapua University
