A highly skilled Senior Blockchain and Full Stack Developer with a passion for creating innovative, scalable, and secure solutions. Seeking a challenging role in a dynamic and forward-thinking company where my expertise in blockchain technologies, smart contracts, and full-stack development can drive impactful contributions to organizational success and technological advancement.

EDUCATION

Mie University , Bachelor of Computer science | Japan GPA: 4.0/3.8 2009 - 2013

Tech Finalists : Bachelor's Automation Engineering & Bachelor's Computer Science
Courses : Distributed Systems, Blockchain Technology

EXPERIENCE

Blockchain Backend Developer, *BigChance* | Remote (Japan) May 2024 - Jul 2024

- ✓ Developed one of the most advanced NFT standards globally, delivering innovative and efficient solutions for NFT creation, minting, and cross-chain transactions.
- ✓ Leveraged a comprehensive tech stack to deliver robust solutions across multiple blockchain platforms, including Ethereum, Polygon, and Base.
- ✓ Encompassed both frontend and backend development, ensuring seamless integration of blockchain functionalities.
- ✓ Applied cutting-edge blockchain technologies to create user-centric, scalable solutions.
- ✓ Reduced transaction fees for a DApp by 30% by optimizing Rust smart contract code.

Blockchain Developer, *Kyuzan* | Remote (Japan) Jul 2018 - Apr 2024

- ✓ Developed Simple but powerful tool which enables you to keep track of all open topics, manage priorities, build and share know-how and much more.
- ✓ Developed the backend web services using Python and Django REST framework.
- ✓ Proven experience as a full stack developer utilizing multiple development languages such as JavaScript, TypeScript, PHP, Ruby, Python, etc.
- ✓ Specialized in Solidity for various blockchains such as Polygon and Ethereum.

Full Stack Developer, *Autify* | Intern (Japan) Jul 2013 - Jun 2018

- ✓ Designed and maintained front end for web and mobile applications using ReactJS, NextJS, VueJS, AngularJS and TypeScript.
- ✓ Developed robust backend services and APIs with C# and .NET to support web and mobile applications.
- ✓ Integrated front-end interfaces with .NET-based RESTful APIs for seamless functionality.
- ✓ Wrote unit tests in C# and TypeScript to improve code predictability and documentation.
- ✓ Optimized performance and scalability of .NET applications, ensuring efficient resource utilization.

SKILLS

Languages

JavaScript/TypeScript, Python, C/C++, C#, Java, Solidity, Rust, Dart, Git

Frameworks

ReactJS, NextJS, VueJS, AngularJS, Laravel, NestJS, Express.js, .Net, MongoDB, MySQL, Firebase, Superbase, TailwindCSS/Bootstrap, Anchor, Hardhat, Truffle

Hosting

Vercel, AWS EC2/VPS, Netify, Firebase, Google CloudFlare

Blockchain & Web3

Ethereum, Solana, BSC, Cardano, Cosmos SDK, Yeild Farming, Staking, Cross-chain Bridge Development, Ton, DeFi, NFT Marketplace, Tokenomics
